PROFESSIONAL SUMMARY

Android + Flutter Developer with 2.5+ years of experience delivering scalable apps, improving performance, and building clean, maintainable architectures.

SKILLS

Languages: Java, Kotlin, Dart, Python, JavaScript, C++

Libraries and Frameworks: Flutter, Jetpack Compose, Retrofit, Dagger Hilt, Room, Firebase, GetX, Riverpod, Dio

Developer Tools and Technologies: Android Studio, Xcode, Git, GitLab, GitHub, Gitea, TortoiseSVN, VS Code, Postman, JIRA, Linux, Push Notifications, WebSockets, RabbitMQ, Realm Database, MySQL, MongoDB, Remote Config, Analytics, Agile, Scrum

EXPERIENCE

Software Engineer | Big Oh Tech (Outsourced to NEC India) | April 2024 - present

Noida, Uttar Pradesh

- Independently managing multiple Kotlin & Flutter projects, from initial development to successful deployment
- Effectively collaborating with cross-functional teams, maintaining smoother progress and issues resolution
- Led end-to-end debugging and optimization to ensure high-performance mobile applications

Technical Consultant | IBM India Private Limited | June 2022 - May 2023

Noida, Uttar Pradesh

- Deployed and managed cloud-based applications on Microsoft Azure, leading to improvement in app performance
- Implemented integrations using RESTful APIs, enhancing overall system functionality
- Contributed to the app development, leveraging expertise in Kotlin, MVVM, Coroutines, Docker, Azure, and Flask

Software Development Executive (Internship) | Skrolled | March 2022 – June 2022

Delhi

- Led the end-to-end app life cycle process, ensuring successful delivery from conceptualization to deployment
- Implemented best practices, like MVVM, Jetpack Components, Asynchronous tasks, to boost app performance

PROJECTS

Yatra | Android Application, Java, Kotlin, Jetpack Compose | Big Oh Tech

- Revamped user interface using **Kotlin, XML, Jetpack compose**, improving user engagement and experience
- Optimized performance using **Coroutines, Flow**, reducing load times by 30% and boosting responsiveness
- Migrated **Java code to Kotlin**, streamlining the codebase and improving maintainability by 25%

Mi-City CEP | Flutter Application, Dart, GetX | NEC India

- Developed the application using **Dart, GetX, Dio**, ensuring a scalable and maintainable codebase.
- Implemented a **server-driven UI** model using dynamic widgets and JSON-based configurations, enabling real-time layout updates without app releases.
- Led the complete development lifecycle from **architecture design to deployment**.

VMS - Video Management System | Flutter Application, Dart, Riverpod | NEC India

- Architected a scalable **Flutter** codebase using **Riverpod** and **Clean Architecture** principles.
- Implemented efficient **asynchronous streams** for seamless video playback and background file downloads.
- Designed a scalable **multi-environment build system** from a single codebase, improving release reliability.

EDUCATION

Master of Computer Applications, MCA

Amity University

July 2019 – July 2022

Noida, UP

Bachelor of Science, BSc.(CS)

Atma Ram Sanatan Dharma College, Delhi University

July 2015 – Aug. 2018

Delhi
